

EPDM Rubber E8360

Description:

EPDM belongs to the important group of technical elastomers called Ethylene-Propylene. The material is easily processed. The physical as well as mechanical characteristics of the material are good compared to other rubbers.

The E8360 EPDM rubber is especially suited for applications in the food and beverage industry, but is not regarded as resistant to fuels and oil.

Specifications	Values
Colour	White / Beige
Hardness, °Shore A	60 ± 5
Density, g/cm ³	1.16
Elongation at Break, %	550
Tensile Strength, N/mm ²	12
Temperature Range in Air	Min. -25° C Max. +100° C

Approvals: FDA conformity

Rev. 01

.The function and durability of gaskets are highly dependant on the application and the medium. Since the conditions of use are beyond our control, ELWIS ROYAL can only be held responsible for the characteristics of the material and for the geometrical shape of the gasket.
